

Important Messages

Handicaps in the Summer Superbowl league are currently calculated at 90% of the difference between a bowler's average and 230. Since we now have league bowlers who have an average greater than 230, we have decided to apply USBC Rule 100g/2 and set the handicap base at 240--a value higher than any average in the league. This adjustment will allow the handicap mechanism to function correctly without the need for negative handicaps. This change will take place starting with week three's bowling.
